2017 Specific Technical Regulations for Rallying

The following Articles of 2017 FMSCI Appendix J is applicable

Art.251 – Classification and Definitions

Art.252 – General Prescriptions for Production Cars (Group N), Touring Cars (Group A)

Art.253 – Safety Equipment (Groups N, A)

Art.254 – Specific Regulations for Production Cars (Group N)

Art.255 – Specific Regulation for Touring Cars (Group A)

Changes to the above Articles specific to 2017 Rallying are reproduced below:

It is permitted to use after market replacement parts as long as such parts are in conformity with the homologated parts (including of Optional Variants in Group N) in ALL ASPECTS except the brand name. Such parts should have no additional function/s relative to the original parts.

Art.252 General Prescriptions for Group N and A

1) Art.9 : Fuel Combustive

Fuel Free

Art.254 Specific Regulation for Production Cars (Group N)

1) Art.6.1 : Engine

a) Carburettors

Air filters – Free (Air Filtration methods are free up to the carburettor or the throttle body).
Explanation to Scrutineers : Additional Air Intake, Fabricated or otherwise may be allowed.

b) Exhaust

Free. (Exhaust manifold to the exit is free.) However the Exhaust ports in the cylinderhead should remain as provided by the manufacturer.

The noise levels on the open road must not exceed 103 dBA. The test speed for a given engine will be the engines speed that correspond to an average piston speed of 914.4 m/minute.

The location of the exit of the exhaust pipe is as per Homologation/TDF.

The exhaust system must not be provisional

Exhaust gases may only exit at the end of the system

These liberties must not entail any bodywork modifications and must respect the Indian Motor Vehicle Act.

2) Art.6.2.1 : Clutch

The disc is free, including the weight, with the exception of the number of plates.

The diameter of the clutch disc may be varied.

3) Art.6.2.2 : Gear Box

Internals of the gearbox as per Homologation / TDF.

4) Art.6.2.3 : Differential

The use of a mechanical type limited slip differential is authorized, provided that it can be fitted in the series housing.

5) Art.6.3 : Suspension

1.1) Strengthening of rear knuckle with addition of material with or without creating hollow section is allowed.

1.2) Shock Absorber

- a) For rallies taking place in India, a silent block may be replaced by a "Uniball" joint even if the shock absorber has a guiding function.
- b) Front suspension top mounting – fitting of uniball joint is permitted and modifications required in the strut tower to accommodate the uniball joint may be allowed.
- c) To facilitate fitment of larger dimensioned top mounts of the rear shock absorber, enlarging central bore of the top plate in the chassis is permitted as long as the mounting points remain unchanged. Minor machining to the lower arm to accommodate gas hose of the rear shock absorber canister is also permitted.

1.3) Ride Height

For asphalt rallies only, the ride height of the car may be reduced by a maximum of 25mm from the homologated ride height of the car.

6) Art.6.4.1 : Wheels

Wheel size 1inch more in width is permitted and 1 inch more rim dia than the homologated size is permitted

7) Art.6.5 : Braking System

If the anti-lock braking system (ABS) is disconnected or removed, the use of a mechanical rear braking distributor is authorized.

In the case of a car fitted with servo-assisted brakes, this device may be disconnected or replaced.

8) Art.6.5.1 : Handbrake

The mechanical handbrake may be replaced with a hydraulic system but in this case a diagonal brake circuit (X shape) or the original system is mandatory.

It is permitted to modify the position of the hydraulic handbrake system, provided that it remains in the location homologated in Group N (on the central tunnel...).

9) Art.6.7 Bodywork

Strengthening of chassis is permitted by suitable welding process ; collateral addition of material deposit in the process of welding is allowed.

10) Art.6.7 Exterior

It is permitted to relocate the windshield washer water container within the space under the bonnet . The water container can be from any car manufactured in India.

11) Art.6.7.2.6 Heating System

- a) Read as : The original heating equipment may be retained.
- b) Using of a shorter drive belt after removal of a/c compressor is permitted.

12) Roll Cages:

Cold drawn seamless unalloyed carbon steel tube (Containing a maximum of 0.3% of carbon) with a minimum tensile strength of 350 N/mm²

The minimum dimensions being 45mm X 2.5mm or 50mm X 2mm.

The basic minimum structural requirement as per Drawing 253-29 with side impact bars as in Drawing 253-11 and reinforcement Drawing as in 253-12

It must be fitted on each side of the front rollbar if dimension "A" is greater than 200 mm (Drawing 253-15).

It may be bent on condition that it is straight in side view and that the angle of the bend does not exceed 20°.

Its upper end must be less than 100 mm from the junction between the front (lateral) rollbar and the longitudinal (transverse) member (see Drawing 253-52 for the measurement).

Its lower end must be less than 100 mm from the (front) mounting foot of front (lateral) rollbar.

253-7

253-15
